Paper 1 Multiple Choice

2281/13

October/November 2018

45 minutes

Additional Materials: Multiple Choice Answer Sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

* 2 5 1 2 3 4 5 5 0 5 *

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

Do not use staples, paper clips, glue or correction fluid.

Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

DO **NOT** WRITE IN ANY BARCODES.

There are **thirty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A, B, C** and **D**.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer.

Any rough working should be done in this booklet.

Done

This document consists of **10** printed pages and **2** blank pages.

1 Which example of a factor of production in the fishing industry is correct?

	factor	example
☐ A	capital	charges on loan for fishing boat
☐ B	enterprise	salaries of fish warehouse managers
☐ C	labour	profits of fish shop owners
☒ D	land	fish in the sea

Man-made resource → Money is not a factor of production
 Risk taker → labour
 Enterprise
 Land: Natural resource

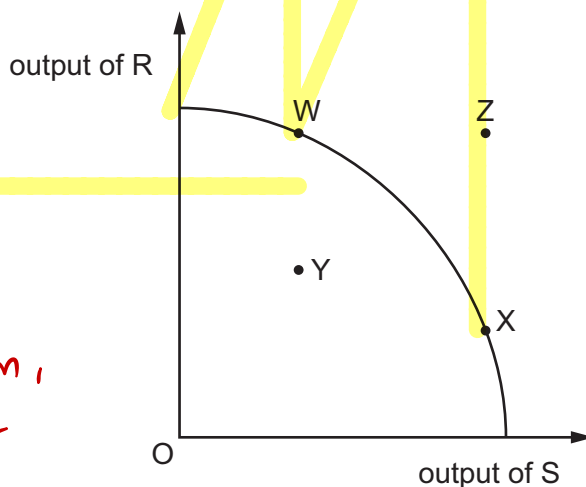

2 Hospital services are provided by the government and paid for through taxation. People cannot always get the treatment they require because of long waiting lists.

Of what is this an example?

- ☐ A external cost (cost to the third party)
☐ B market system (Demand and Supply)
☒ C perfectly inelastic supply (fixed quantity)
☐ D scarcity (unlimited wants but limited resources)

3 The diagram shows a production possibility curve (PPC) for an economy.

B: Efficient to inefficient.

Concept of reallocation, opportunity cost

Actual

Which change on the diagram could represent an increase in unemployment?

☐ A W to X

☒ B W to Y

☐ C Y to X

☐ D Y to Z

Unemployment ↓

from actual to unattainable

4 Who determines what goods and services are produced in a market economy?

Demand and Supply

☒ A consumers

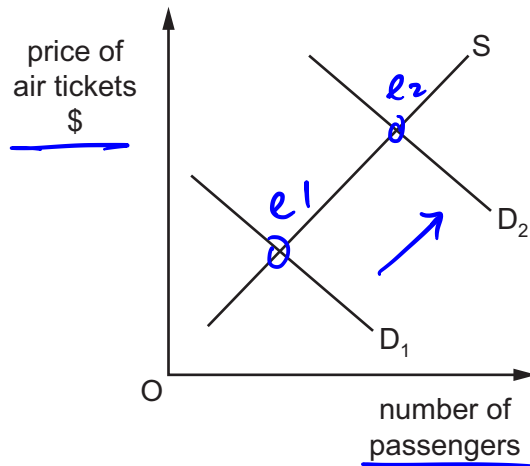

→ consumer sovereignty

☐ B employees (No)

☐ C government (planned)

☐ D trade unions (No)

- 5 The diagram shows the demand for and the supply of air travel.

What could cause a shift of the demand curve from D_1 to D_2 ?

- A an increase in airline costs *cost ↑, S ↓*
 B an increase in airport taxes *cost ↑, S ↓*
 C an increase in incomes *ability / affordability ↑, Demand ↑*
 D an increase in worldwide terrorism *Demand ↓*

- 6 In 2015, the world price of oil fell rapidly due to changes in the conditions of demand and supply. One change was the use of a new method of extraction called fracking. *Supply ↑*

Which event would not have contributed to the fall in prices?

- A China's growth slowed leading to lower oil imports. *growth ↓, P ↓*
 B Saudi Arabia increased the volume of its oil supplies. *S ↑, P ↓*
 C UK protest groups prevented the introduction of fracking projects. *protest, S ↓, P ↑*
 D USA became more self-sufficient in oil due to fracking and reduced imports. *S ↑, P ↓*

- 7 The table shows the demand and supply for spices in a market in Africa.

price per kg (US\$)	quantity demanded (kg)	quantity supplied (kg)
10	50	10
20	40	20
30	30	30
40	20	40

$$PED = \frac{\% \Delta \text{ in } QD}{\% \Delta \text{ in price}}$$

$$PED = \frac{25\%}{50\%} = 0.5$$

$$\% \Delta = \frac{\text{New} - \text{Old}}{\text{Old}} \times 100$$

$$\% \Delta \text{ in } QD = 25\%$$

$$\% \Delta \text{ in Price} = 50\%$$

When the price rises from US\$20 to US\$30 per kg, what is the price elasticity of demand (PED) for spices?

- A 0.25 B 0.5 C 1.0 D 2.0

Buying and selling of shares

8 What is a function of a country's stock exchange?

- A to act as lender of last resort to commercial banks *central bank*
- B to provide a market for the purchase and sale of shares
- C to provide short-term loans for investment *(commercial bank)*
- D to set interest rates within the country *central bank (monetary policy)*

* Stock exchanges function as 'continuous auction' markets where traders consummate transactions through electronic trading platforms. It is a stock market where listed securities of companies, government, and semi-government organizations are traded

9 What might cause an increase in the earnings of a doctor in a government health service?

- A an increasing number of doctors graduate from university each year *supply ↑, wage ↓*
- B an increasing number of people need health care *Demand ↑ (Health), Demand ↑ (doctors), wage ↑*
- C the government spends less on the nation's health services *less doctors needed, C ↓*
- D the population becomes more aware of healthy eating *self awareness, less treatment*

10 What would put a trade union in a strong bargaining position to negotiate higher wages for its members in a particular firm?

- A The demand for the product produced by the workers has an inelastic demand. *wages can be increased, firms can easily pass this burden in form of higher price*
- B The economy is experiencing high unemployment. *surplus of workers, wages ↓*
- C The proportion of the firm's workers in the union is low. *less members, low power*
- D Wage costs are a high proportion of total costs for firms in the industry. *wages ↑, cost ↑, ... won't be able to raise wage*

11 What is most likely to encourage the immediate purchase of an expensive item such as a new car?

- A anticipating a fall in the rate of inflation *Andaza purchase it later*
- B expecting interest rates to fall *Cheaper borrowing ahead*
- C making it easier to obtain a loan *loan reviewed, immediate purchase*
- D needing to plan for unexpected emergencies *decline in spending*

12 The table shows characteristics of a market.

What are the characteristics of a perfectly competitive market?

	product	number of buyers	number of sellers	role of firm
A	identical ✓	many ✓	many ✓	price taker ✓
B	identical ✓	one	many ✓	price maker
C	similar	many ✓	many ✓	price taker ✓
D	unique	few	few	price maker

perfect competition: 1000s of producers, producing and selling same product, and the market share is so small that they can't influence price level, that is price takers.

* same / standardized / homogeneous / identical

Secondary → Vertical 5 → Backwards → Primary

- P
- S
- T

Back
forward

13 A computer chip manufacturer expands by taking over a computer chip designer.

Of what is this an example?

- A backward vertical integration *Secondary to primary.*
 B diversifying integration *diversify, different industry, e.g. chip manufacturer takes over pizza company.*
 C forward vertical integration *with tertiary/service sector*
 D horizontal integration *same stage, same industry*

14 The table shows a firm's average revenue and average cost at different levels of output.

When all output is sold, which level of output gives maximum profit?

	output (units)	average revenue (US\$)	average cost (US\$)
A	5	10	30
B	10	20	20
C	15	25	15
D	20	30	18

Profit (AR-AC)
 -20
 0
 10
 12 (Highest)

15 Which statement about total fixed cost is correct?

- A It falls as output increases. *applies to Average fixed cost*
 B It is calculated by adding total cost and total variable cost. *TC = FC + VC, so, TC - VC = FC*
 C It is calculated by dividing total cost by output. *TC/Q = Average cost or Average total cost or per unit cost*
 D It must be paid even if output is zero. *That's why horizontal line, doesn't start from origin.*

16 What is most likely to be an example of a progressive tax?

- A customs duties on imported goods
 B excise duties on cigarettes
 C income tax
 D sales tax

Direct tax (Income tax, Corporation tax)
 All are indirect tax (Regressive)

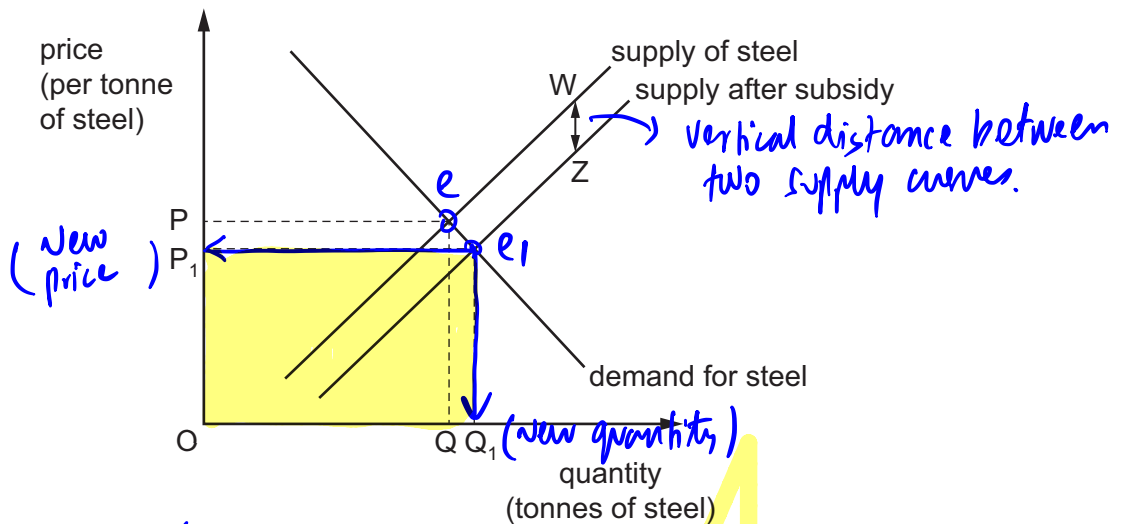

17 When is a government said to balance its budget? *(Tax revenue = Government spending)*

- A when all goods and services are taxed equally *No*
 B when economic growth is the same in all regions of the economy *No*
 C when its total income equals its total expenditure
 D when total exports equal total imports *Related to Balance of trade*

* Difference between balance of trade and balance budget.

- 18 A government aims to boost production and increase sales of steel by subsidising private producers. A subsidy equal to $W - Z$ per tonne is paid.

According to the diagram, what would be the value of sales of steel after the subsidy?

- A $OP \times OQ$ B $OP_1 \times OQ_1$ C $WZ \times OQ$ D $WZ \times OQ_1$

- 19 In which case is success for the government in achieving the first aim likely to cause problems in achieving the second?

	first aim	second aim
<u>A</u>	full employment	price stability
B	high economic growth	full employment
C	price stability	stable balance of payments
D	stable balance of payments	more even distribution of income

$AD \uparrow > AS$: price $\uparrow$ (inflation)
 $\downarrow$ employment $\uparrow$

$\Rightarrow$ LRAS diagram
 (growth, $AD \uparrow$, output $\uparrow$, employment $\uparrow$)
 (e.g. Tax $\uparrow$, $C \downarrow$, $AD \downarrow$, $P \downarrow$)
 $\downarrow$ Imports $\downarrow$, BoP stable
 Tax $\uparrow$, transfer payments, redistribution

- 20 When is a recession said to occur?

- A Economic growth in the economy falls for at least two consecutive quarters.
B Gross domestic product (GDP) falls for at least two consecutive quarters.
 C The current account of the balance of payment is in deficit for at least two consecutive quarters.
 D The government experiences a budget deficit for at least two consecutive quarters.

(outflows > inflows : $FR \downarrow$ (Depreciation))

$\rightarrow$ Government Spending exceeds tax revenue : Expansionary fiscal policy

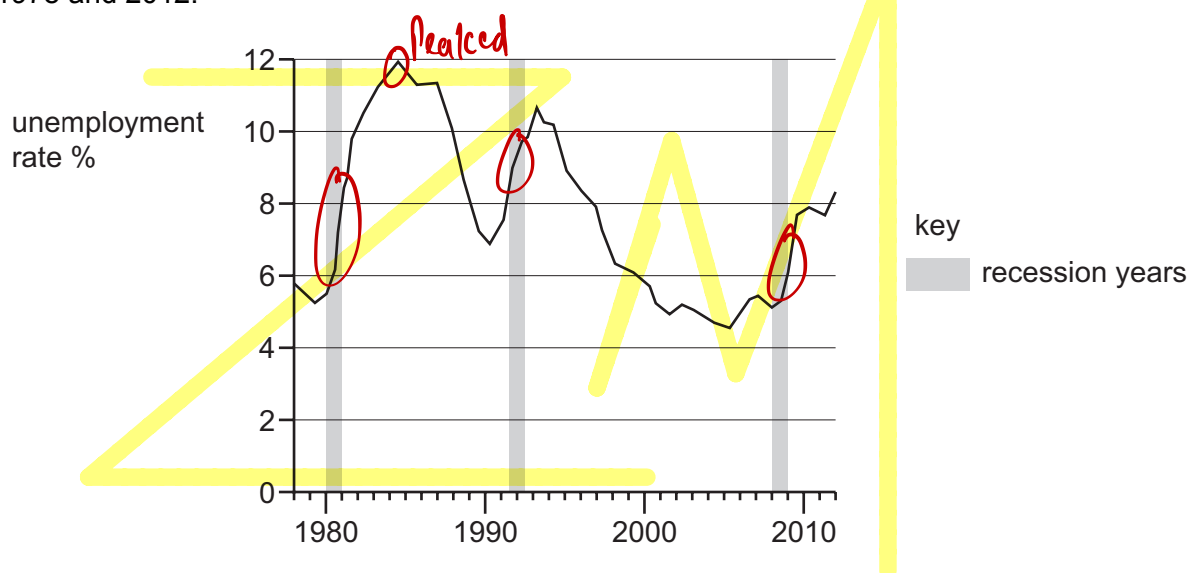

GDP/output falls for 2 consecutive quarters

Negative inflation
persistent and sustained fall in
general price level over a given
period of time.

21 Which country is suffering from the worst deflation?

	annual change in indicator		
	<i>Negative</i> inflation %	<i>Positive</i> unemployment rate %	<i>Negative</i> real GDP per capita (US\$) %
A	-5 ✓	+3 ✓	-3 ✓
B	-2 ✓	-2	-2 ✓
C	+2	-3	+1
D	+12	+10 ✓	+3

22 The diagram shows the rate of unemployment and the periods of recession in a country between 1978 and 2012.

What can be concluded from the diagram?

- A** Each recession lasted for more than two years. *Mostly a year*
- B** Recessions occurred at regular intervals. *No regularity, see the gap between 1990 - 2010*
- C** The unemployment rate peaked in a recession period. *No, see where I have written peaked*
- D** The unemployment rate rose during recession periods. *see the circles, correct statement*

- 23 A country experienced its usual August increase in the rate of unemployment. Unfortunately this was followed by the loss of jobs resulting from the regular downturn in global economic activity.

Which types of unemployment occurred?

	first type of unemployment (August)	second type of unemployment (global downturn)
A	cyclical	structural
B	frictional	seasonal
C	seasonal ✓	cyclical ✓
D	structural	frictional

→ AD ↓
(Demand deficient or Cyclical unemployment)

- 24 What is the most likely effect of raising the retirement age in a country?

- A government spending increases *Spending ↓ on pensions*
 B net immigration increases *unrelated, this means more people coming in*
 C spending on pensions increases *same as option A.*
 D working population increases *Correct, e.g. 50 years to 60 years, extension for 10 years.*

→ labour force ↑

- 25 What describes absolute and relative poverty?

	absolute poverty	relative poverty
A	when there are low birth rates, high death rates, and high levels of migration	when there are high birth rates, low death rates, and low levels of migration
B	when a person <u>does not have</u> enough money for food, shelter, and clothes	when a person <u>earns less</u> than others <u>in the same society</u>
C	when everyone has an income below US\$1.90 a day	when half the population has an income of US\$1.90 a day
D	when necessities cannot be afforded	when luxuries cannot be afforded

→ compare to others

laqi
naari hona,
khanay
ke liye
bhi nah
hona!

- 26 Developing countries are sometimes given aid by charities and foreign governments.

Which aid programme would be least likely to lead to long-term economic growth?

- A the building of an irrigation system → All actions are long term in development
 B the construction of a new airport →
 C the distribution of gifts of food *short term* →
 D the training of technical staff → Doesn't help much, temporary relief, -ve: makes dependent.
- productive potential ↑
 → Better travel tourism
 → resource ↑, water facility improves.

- 27 A government imposes a limit of 2 million on the number of smartphones imported into the country.

Which term is given to this limitation?

A ban

B embargo

C quota

D tariff

(Both are same)

→ physical limit on the quantity of goods imported.

(Tax)

- 28 What is **most** likely to happen if South Korea builds a factory in Switzerland that becomes profitable?

A South Korea's imports of goods will decrease.

B South Korea's investment income will increase.

C Switzerland's trade balance in goods will worsen.

D Switzerland's trade balance in services will improve.

Unrelated to imports

profits will be sent back, inflows, +ve

Unrelated, no information of X and M.

Same as option A and C.

- 29 In July 2015, Australia's balance of trade with the rest of the world was -2809 billion Australian dollars. In January 2016 it was -3294 billion Australian dollars.

What describes Australia's balance of trade over this period?

	balance of trade	trend
A	deficit ✓	improving
B	deficit ✓	worsening ✓
C	surplus	improving
D	surplus	worsening ✓

Deficit

deficit ↑ (worsen)

(-2809 to -3294)

- 30 The table shows the tariffs imposed on imported tropical fruit in the European Union (EU) according to the degree of processing.

	EU tariffs (% rate)
fresh <u>tropical fruit</u>	8.0
canned <u>tropical fruit</u>	11.3
bottled <u>tropical fruit drinks</u>	23.6

(Highest)

What might be the reason for this pattern of tariffs?

A to encourage imports of processed products into the EU

B to encourage tropical countries' exports *discourage*

C to help manufacturing industries in the EU

D to help tropical countries develop manufacturing industries

Tax imposed, so to discourage

*Tax is being imposed,
It reduces their exports,
connect to option B.*

*bottled
tropical fruit
drinks tax highest,
to create a switch, to
develop manufacturing
industry in EU!*

NO!
